Subject: Draft Amendment #17

I support the continued funding of the Lynn Canal Highway Project.

The project should be supported for both savings in the consumption of fuel and the carbon footprint differential that is less with a road than any other transportation proposal.

The Lynn Canal Highway would be financed by the costs it saves each year. This project is unique in that it pays for itself.

ally, There can be no savings until the project is completed. The
year proposal should be returned to a 5 year project

Thank you for your consideration
